### Specific conditions for billing a subscriber connection (VTA)

1. Prerequisites for VTA are preselection with Telecom Source and a subscriber connection from Swisscom Ltd. 2. I instruct Telecom Source to pay the price agreed between Telecom Source and Swisscom Ltd for the provision of the subscriber connection (incl. associated supplementary services) to Swisscom Ltd for the duration of VTA. Provided that Swisscom Ltd fulfils all of its obligations from the connection contract. Telecom Source will carry out this instruction accordingly. 3. Telecom Source will charge a basic monthly fee for its services and any supplementary services in accordance with the current Swisscom price list. Questions regarding billing should be addressed directly to Telecom Source. 4. Billing for VTA starts and ends with activation/deactivation by Swisscom Ltd. 5. VTA can be cancelled at any time. VTA will be cancelled immediately if one of the prerequisites for VTA ceases to apply, or if the connection contract with Swisscom Ltd or the agreement between Telecom Source and Swisscom Ltd regarding VTA is terminated. 6. Telecom Source does not offer any guarantee for the subscriber connection and will not accept any liability for damages incurred by the customer that have been caused by Swisscom Ltd.

### Supplement to the subscriber connection contract with Swisscom (Switzerland) Ltd.

1. The subscriber connection for the above mentioned telephone number, incl. supplementary services in accordance with the current list (at <http://www.swisscom.com/ws/products/FMGProdukte/VTA/index.htm>), will hereinafter be billed by the third-party providers specified above at the price agreed with said provider and according to its terms of payment (VTA). All other products obtained from Swisscom (e.g. leased devices, purchases in the Swisscom Shop etc.) are not affected by this contract supplement and will continue to be billed by Swisscom. 2. Swisscom remains the contract partner for the customer for the products billed by the third-party provider, in accordance with Swisscom's applicable provisions. The customer is requested to notify Swisscom directly of any faults, new orders and changes (e.g. relocation, terminations etc.). 3. Swisscom is entitled to supply the third-party provider with the data required for the purposes of processing this contract supplement. 4. It is a prerequisite for VTA that the customer has preselected the same third-party provider as for VTA for its telephony on at least one telephone number for the corresponding subscriber connection (CPS). 5. VTA shall be cancelled as soon as the customer makes a request to that effect to Swisscom, the third-party provider gives notice of termination to Swisscom or collaboration between the third-party provider and Swisscom ends. Swisscom shall not examine the reason for the cancellation. 6. If VTA is ended (lapse of a prerequisite, at the request of the customer etc.) Swisscom shall return immediately to billing on its terms. 7. VTA is activated as a rule within seven days of receipt by Swisscom of notification from the third-party provider. Billing shall be pro rata. Swisscom is entitled to refuse or immediately revoke activation with good reason (e.g. incorrect information, blocked connection). 8. When the third-party provider pays Swisscom, Swisscom's claim to the customer expires. 9. Any claims of the third-party supplier (e.g. charges for breach of contract) shall not relieve the customer of its payment obligation to Swisscom. Swisscom shall accept no liability for damages incurred by the customer that have been caused by the third-party provider.
